90440-VW000 90440-VW010 Automobile Gas Spring for Automotive Spare Parts For Nissan

Our Product Introduction

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 90440-VW000 90440-VW010
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box, Standard tray
- Delivery Time: 3-35 days
- Payment Terms: D/P, L/C, T/T

Product Specification

- Name: Automobile Spare Parts
- Size: Standard
- Country Of Origin: China
- Warranty: 12 Months
- Type: Automobile Gas Spring

Product Description

Product Description:

The Automobile Gas Spring is a component that serves a specialized purpose, designed exclusively for automotive applications. Its function is to provide controlled support and lift assistance to different parts of a vehicle in a precise and tailored manner. This specialized gas spring plays a critical role in the smooth and safe functioning of various automobile components.

Precise and tailored lift assistance is essential in many areas of automotive applications. Hence, the Automobile Gas Spring serves as a vital component in ensuring the smooth operation of various auto parts. Its design comprises of various tailor-made features that make it compatible with automotive requirements. The spring significantly enhances the lifespan and functionality of automotive components, making it a vital part that drivers, vehicle manufacturers, and auto enthusiasts cannot do without.

Automobile Gas Spring utilizes the latest technology to deliver precise, reliable, and consistent lift assistance required in various vehicles' mechanical parts. The latest technological advancements have led to the creation of gas springs that can accurately cater to differing automotive applications, providing exceptional levels of safety and performance. Therefore, it is critical to have a reliable Automobile Gas Spring that guarantees accuracy and consistency to enhance the efficiency and longevity of automotive parts.

Features:

Our Gas Spring is specially designed to provide reliable support and lift assistance for various automotive applications. With its controlled force, it can hold open heavy components such as hoods, trunks, tailgates, and other storage areas, making them easier and safer to access. The smooth and effortless lifting and holding of objects in a desired position are ensured by the gas spring's controlled force. Our Gas Spring offers adjustable force and stroke options to meet specific automotive requirements. With the capability to adjust the gas pressure or volume within the cylinder, the force exerted by the spring can be customized to meet the needs of different applications. This makes it possible to provide precise support and lift assistance tailored to the specific weight and movement characteristics of the component.

In addition to its adjustable force and stroke capabilities, our Gas Spring also provides effective damping and motion control. It helps reduce vibrations, noise, and impact forces in automotive applications and absorbs and dissipates energy generated by moving parts. This feature is particularly beneficial in vehicle suspension systems, as it enhances ride comfort and stability.

Safety and reliability are at the core of our Gas Spring's design. Built-in safety features help mitigate the risk of uncontrolled or sudden movements. Its valves regulate the speed of extension and retraction, providing safe and controlled operation that minimizes the risk of accidents or injuries.

Durability and longevity were also taken into account when designing our Gas Spring. With robust steel or stainless steel components, it can withstand the harsh automotive environment, including exposure to vibrations, temperature variations, and moisture, without compromising its functionality.

Finally, our Gas Spring is engineered for easy installation in various automotive applications. With specific mounting points and interfaces, it offers a straightforward and hassle-free installation process, saving time and effort during assembly or replacement.

Technical Parameters:

Product Name:	Automobile Spare Parts
Type:	Automobile Gas Spring
Size:	Standard
Country of Origin:	China
Warranty:	12 Months

This product belongs to the category of Automobile Components, Auto Parts, and Vehicle Components.

Applications:

Upgrade Your Vehicle with Our Premium Automobile Gas Spring

Make the most out of your driving experience and upgrade your vehicle with our exceptional Automobile Gas Spring. Our product provides reliable support, lift assistance, and motion control, catering to automotive applications and contributing to enhanced functionality, convenience, and safety.

Trust in the durability and performance of our Gas Spring to deliver consistent and controlled force, ensuring a smooth and comfortable ride. With our product in your vehicle, you can experience superior comfort and performance as you drive.

Support and Services:

Our Automobile Spare Parts product technical support and services include:

Assistance with installation and set-up of spare parts

Troubleshooting and diagnosis of issues with spare parts

Recommendations for compatible spare parts

Guidance on proper maintenance and care of spare parts

Repair and replacement services for defective spare parts

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years

- A large of stock

- Professional export company

- Accept small order

- We can design anything well according to customers' requirment
